

rejiband®

Welded rod metal tray, with safety edge, for the carrying of electrical and telecommunications wiring.

Patented safety edge. Avoids damage to cables and injury to the installer.
It is lightweight providing maximum ventilation and cleanliness for the cables.
Provides high strength and flexibility.
Savings in material costs and labour.

* kg/m at 1.5m support distance.

Applications:

- Management and distribution of electrical and telecommunications wiring for Civil Works Facilities, Tunnels, Public Buildings, Shopping Centres, Hospitals, Major Infrastructures, Airports, Underground Transport, Railways, etc.
- Industrial facilities sectors. Naval applications, Petrochemical, Textile, Chemical and Food.
- Especially suitable for photovoltaic (PV) systems, Wind, Energy Industry, Renewable Energy.
